

Bring Your Own Device- devices

We know that so far students have been able to bring all types of device brands, but our aim is that, in two years' time, all students will start working with the Apple brand, facilitating control and making the best use of the devices. We have a year to adapt. We understand that this may create disparity of opinions, but after comparing, discussing and comparing all the different brands available for the educational sector, we have considered that Apple is the one that offers us the most possibilities from a pedagogical, educational and, above all, security point of view.

We would like to remind you that from MYP4 onwards, the device that students have to bring with them is a computer.

The following 2 years, as mentioned, you can bring any device, but we need to know which one, and for that, we need you to fill in this [form](#).
